www.momentumwatch.com

THANK YOU... for your purchase. Your new watch has been carefully designed to give you years of reliable service. The design incorporates the latest watchmaking technology and a reliable, Swiss made 25 jewel automatic (self-winding) movement. Please let us know if you have any comments or suggestions as to how we might improve our products.

USING THE SCREW CROWN (C)

Your watch is equipped with a screw-down, locking crown. This screws into the case like a submarine hatch, to ensure the most reliable possible waterproof seal. To set your watch, you must first unscrew the crown by turning it counter-clockwise 4-5 turns. It can then be pulled gently out from the case for setting. After setting or resetting the watch always ensure that you screw the crown back into the case by pressing it firmly into the case; then, applying a gentle pressure against the case, turn the crown clockwise 4-5 turns until it is snug against the case. Always ensure that it turns smoothly and is not cross-threaded. Do not overtighten! (Finger-tight will ensure a good water-proof seal.) If damage to the watch occurs due to a failure to screw in the crown correctly, such damage cannot be covered under warranty.

SETTING THE TIME, DAY, AND DATE

To set the watch, first unscrew the crown to the neutral position (1). Now, pull the crown out all the way to the TIME Setting position (3). Turn the hands forward until the date in

the date window changes - this is midnight. Continue to turn the hands forward until the correct time is displayed.

(NOTE: If setting the watch in the afternoon, you must turn the hands forward at least 12 hours, otherwise, the date will change at noon, not midnight.)

To set the date, push the crown in one step to position 2. Turn counter-clockwise until today's date shows in the date window. Turn clockwise a few turns to set the day. It is recommended not to set the day (or date) after 9PM or before 5AM, as this could result in the day (or date) not changing correctly. Most day disks are bilingual: to change the day to the other language, simply turn the day forward one "click" after 9PM or before 5AM. Finally, always remember to press in the crown and screw it firmly into the case after setting.

STARTING YOUR WATCH

Your watch uses a mechanical movement, with no batteries. It is "powered" by a spring, which needs to be wound regularly. Provided you wear your watch, the regular motion of your wrist will cause a rotor in the back of the movement to spin, thereby winding your watch. When fully wound, your watch will run for approximately 35 hours without winding. If you do not wear your watch for a longer period, it will stop: You must give it a good shake to spin the automatic rotor and start the watch. You can also unscrew the crown, then give it several turns in the neutral position to manually wind the watch and start it running. Once the second hand is running, set the time and date, then press in and screw down the crown firmly.

USING THE INTERNAL ROTATING BEZEL (B)

Your watch is equipped with an internal rotating bezel. This is the ring around the outside of the watch face, inside the watch, which gives you a simple and legible way to track bottom-time on a dive, or any elapsed time. Simply turn the bezel so that the arrow marker is opposite the minute hand. The minute hand will move forward. You can then read the time elapsed since you set the bezel, by looking where the minute hand points on the bezel. While the intended use of this is for diving, it can also be useful reminder for everyday timing. (e.g. remembering elapsed time on a parking meter!) Also note that your bezel turns in both directions, as such once you set the bezel be very careful not to touch the bezel knob (B).

TECHNICAL NOTES:

1. ACCURACY: specially made in Switzerland, the movement contains the finest quality, 25 jewel automatic movement. While not as precise as a quartz watch, it should be accurate to approximately 3-5 minutes per month when new. The movement is carefully oiled and tuned; over time, the oil will dry out and thicken, causing your watch to run slower. For this reason, we generally tune watches to run slightly fast when new;

Please read instructions carefully to understand how to operate your Momentum® watch. Your model may not have all of the features described in this booklet.

Veillez lire attentivement les modes d'emploi pour bien comprendre le fonctionnement de votre montre Momentum®. Toutes les fonctions décrites ne sont pas disponibles sur tous les modèles.

Lesen Sie bitte diese Anleitung für Ihre Momentum®-Uhr genau durch. Es ist möglich, daß Ihr Modell nicht alle in dieser Gebrauchsanweisung beschriebenen Funktionen aufweist.

they will then gradually slow down. When you find your watch is slow and needs to be reset too often, it is time to have your watch serviced and re-tuned.

2. SHOCKS: an extreme impact can cause timekeeping to become erratic. If this happens, send your watch to one of our Service Centers.

3. MAGNETISM: do not expose your watch to strong magnetic fields (e.g. leave it on your television set, which contains a large magnet); this can magnetize the movement and cause inaccurate timekeeping.

WATER PROTECTION

This watch is designed for underwater use. Each watch is tested to 300M / 990FT and can be used for any water-sports, including diving and swimming, provided the crown is correctly screwed in. Marking regulations in some countries do not allow the use of the term "waterproof" on watches, even on diver's models. That is why we mark our watches as "water-resistant" tested to a specific depth-rating.

CHOOSING THE RIGHT BAND

A selection of alternate bands are available to fit your watch: these may include natural rubber, various styles of high quality leather bands, or a matching metal bracelet. If you would like to order an alternate band for your watch, please contact your dealer, or our Service Centre, or visit: www.momentumwatch.com

CRYSTAL

Your watch is fitted with an anti-glare sapphire crystal. Please note that while sapphire glass is almost impossible to scratch, an impact with a hard object can crack or shatter it. If this happens, return the watch to one of our Service Centres and the crystal can be replaced. (Impact damage is not covered under warranty.)

TEMPERATURE CARE

Avoid temperature extremes. Exposing your watch to high temperatures, such as placing it on the dashboard of a vehicle or use in a jacuzzi or hot tub may cause the watch to malfunction, shorten battery life, or cause deformations of certain components leading to mechanical failures. Leaving the watch in extreme cold temperatures may cause irregular time keeping until the watch returns to normal operating temperatures. For these reasons, you should remove your watch prior to exposure.

TWO YEAR WARRANTY

Great care has been taken to ensure that your watch will give you many years of reliable service. It is guaranteed for two years against any defect caused by a fault in its manufacture*. Please retain your purchase receipt as proof of warranty. The best possible materials and components have gone into your watch. To keep it in top condition, please treat it with care and have it professionally serviced at regular

ATTENTION: Your watch is equipped with a screw-down crown system for maximum water-resistance. Please refer to your warranty / manual for important information about this feature.

A NOTER: Pour assurer une étanchéité optimale, votre montre est équipée d'une couronne spéciale vissée. On vous prie de bien vouloir lire attentivement les modes d'emploi, pour bien comprendre la mise à l'heure, et l'emploi de la couronne.

ACHTUNG: Ihre Uhr ist mit einer verschraubten Krone versetzt um eine optimale Wasserdichtigkeit zu gewährleisten. Bitte lesen Sie vorsichtig die Gebrauchsanweisung, um sicher zu sein, dass Sie die Einstellung der Zeit und Benutzung der verschraubten Krone genau verstehen

intervals.

* Loss or damage caused by accident, negligence, or opening, repair by unauthorized persons is excluded from this warranty, as is cosmetic deterioration of the case or bracelet caused by wear & tear or abuse and damage caused by cracked or broken crystals. Moisture damage caused by failure to screw in the crown correctly is also not covered under warranty.

2/4/6 YEAR EXTENDED WARRANTY

Please retain your purchase receipt for proof of warranty. After the initial 2-year warranty expires, we recommend that you extend your warranty by sending your watch to a St. Moritz / Momentum® Service Centre for a Full Service*. This is a chargeable service which includes: battery replacement, cleaning, lubrication, and accuracy tuning of the movement as required, lubrication or replacement of all seals, pressure testing to original specification, return shipping and insurance, and a 2 year warranty extension. After 4 years, send it in for another Full Service and extend the warranty for a final two years (for a total of 6 years from original purchase date). Nobody knows your watch like we do! Expert technicians, original parts and the latest equipment will ensure that your watch is serviced right. To check current Full Service pricing please visit our website at: www.momentumwatch.com

* Full Service Packages include an extension of the original warranty, for as long as parts are available. Please note however that a Full Service for older, discontinued models may not include an extension of the warranty, if original parts are in limited supply or unavailable. Please check with our Customer Service Department for to confirm whether any non-current models qualify for the extended warranty.

IF YOUR WATCH REQUIRES SERVICE, REPAIR, OR BATTERY CHANGE please return it to the appropriate SMWC Service Centre as shown in this manual. Our Service Centres can provide repairs, service, and replacement bands, promptly and at reasonable prices. For the most current Service Centre addresses and to download the Service and Repair form, please visit our website at: www.momentumwatch.com

Questions?
1-800-663-1881
(Weekdays, 9am-5pm Pacific time)

MERCI d'avoir choisi cette montre Momentum®. Votre nouvelle montre à été conçue pour donner plusieurs années de service fiable. Si vous avez un commentaire quelconque ou une suggestion pour l'amélioration de nos produits, on vous prie de nous contacter.

Emploi de la couronne visée (C)

i). Dévisser la couronne dans le sens 12h ~6h en position 1.

ii). Tirer la couronne en position de mise à l'heure (jusqu'au premier cran (2) pour la date; jusqu'au 2e cran (3) pour l'heure)

iii). Repousser la couronne.

Revisser la couronne selon indications ci-dessous

Pour revisser la couronne:

> appuyer légèrement sur la couronne en la tournant à droite dans le sens de 6h~12h jusqu'à ce qu'une résistance soit ressentie. Ne pas forcer!

> Une espace de 0.05mm doit subsister entre la couronne et la boîte. Les joints comprimés constituent une fermeture étanche.

>>> N'oubliez pas de toujours revisser la couronne!

Mise à l'heure

Réglage de la date

Pour la mise à l'heure, dévisser la couronne dans la position 1. Tirer la couronne au fond dans la position 3. Tourner les aiguilles en avant, jusqu'à ce que la date change pour signifier minuit. Continuer de tourner les aiguilles en avant pour la mettre à l'heure. (N.B. Si la mise à l'heure s'effectue après midi, il va falloir avancer les aiguilles au moins 12 heures avant de mettre l'heure exacte... sinon, la date changera à midi !)

Pour changer la date:

N.B. Il ne faut jamais mettre la date entre minuit et 5 h du matin. Repousser la couronne légèrement en position 2. Tourner à gauche pour mettre la date d'aujourd'hui. (S'il s'agit d'un mois de moins de 31 jours, il va falloir avancer la date à la fin du mois.) La date changera à minuit.

Utilisation de la lunette tournante interne (B)

Au début d'une sortie de plongée ou de n'importe quel évènement, tourner la lunette à gauche, jusqu'à ce que la flèche se trouve en face de l'aiguille des minutes. Comme le temps passera, vous allez pouvoir lire le temps écoulé, indiqué sur la lunette extérieure par l'aiguille des minutes. (N.B. La lunette tournante interne tourne dans les deux directions, alors il faut faire caution pour ne pas toucher le bouton 'B'.

Bracelets disponibles:

Les bracelets originaux sont disponibles pour remplacer un bracelet usé ou pour changer complètement l'allure de votre montre. On vous offre tout un choix de bracelets super-confortable en vrai caoutchouc, bracelets en cuir... Si vous. Pour des renseignements ou des

conseils, veuillez contacter votre détaillant Momentum® ou notre département de service après-vente.

GARANTIE DE 2 ANS

Votre montre a été construite pour vous assurer plusieurs années de service fiable. Elle est garantie contre tout défaut de fabrication* pour une période initiale de 2 ans. On vous suggère de la renvoyer tous les 2 ans pour un service après-vente à l'usine. Cela assurera à long-terme l'étanchéité et la fiabilité de votre montre.

* Perte ou dommages dus à un accident, ou causés par l'ouverture de la boîte par des personnes non-autorisées sont exclus de cette garantie, tout comme la détérioration cosmétique de la boîte ou du bracelet causée par la portée ou l'abus.

Garantie Prolongée 2/4/6 Ans.

Deux ans après l'achat de votre montre, on vous suggère de la renvoyer au Centre de Service St. Moritz le plus proche, pour une "Révision Complète" (prix indicatif \$30~\$35). Cette révision comprend: le nettoyage, la lubrification et le contrôle de la précision comme nécessaire; la lubrification ou le remplacement de tous les joints caoutchouc; la refermeture et le contrôle de l'étanchéité de la boîte; les frais de renvoi et l'assurance; et la prolongation de 2 ans de la garantie originale. A la fin de 4 ans, une deuxième révision complète prolongera la garantie pour 2 ans de plus, jusqu'à 6 ans. Personne ne connaît votre montre comme nous! Nos techniciens/horlogiers experts, des pièces de rechange originales, et une technologie horlogère de pointe vous assurera un service après-vente sans égale.

Pour toute réparation ou tout service, on vous prie de renvoyer votre montre (sans écran) au Centre de Service. N'oubliez pas de joindre la facture d'achat originale, et de nous donner une description du service requis, votre nom, téléphone, adresse et adresse électronique.
